

SPORTEE C-Series: The Ultimate Maintenance Robot for Sports Fields

A solution for every playground: compare **versions A, N and F** to find the robot that perfectly suits your needs for maintaining synthetic, natural or hybrid turf.

Version A

Type of Turf
Artificial – All types

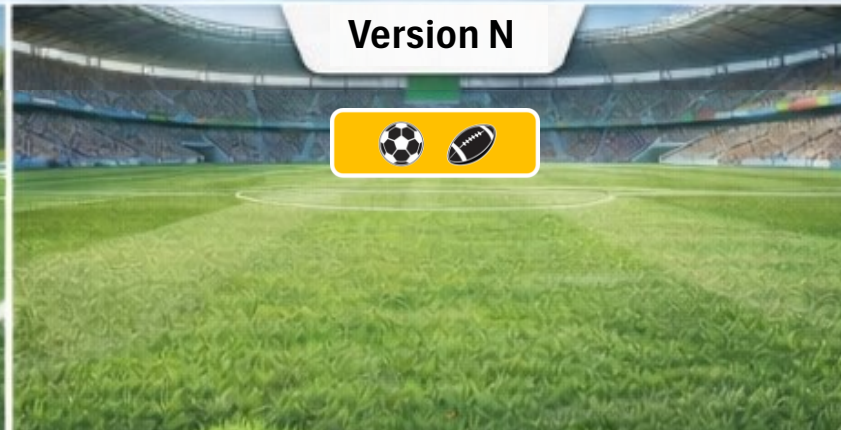

Main uses	Brushing and decompaction
Productivity (for 7,500 m²)	~4h30
Autonomy	~4 to 5 hours depending on the infill

Key Advantage

Manages all infills
Upgradeable to N and F versions

Version N

Type of Turf
Natural and hybrid - All types

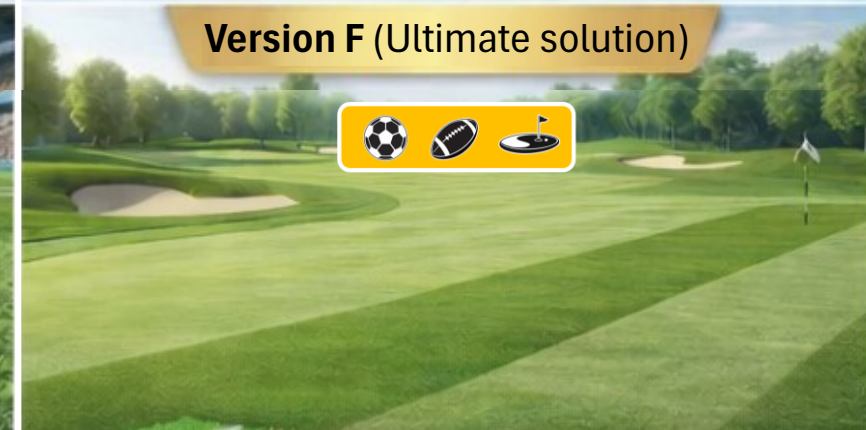

Main uses	Mechanical weeding / thatch removal
Productivity (for 7,500 m²)	4 to 8 hours, depending on contamination
Autonomy	2h30 to 8 hours, depending on contamination

Key Advantage

Control complex weeds.
Example: clover, poa annua...

Version F (Ultimate solution)

Type of Turf
Artificial, natural and hybrid

Main uses	Weeding, de-thatching, brushing, decompacting
Productivity (for 7,500 m²) and Autonomy	Depending on the intended use

Key Advantage

Combines A and N.
Versatility and Simplicity

Common Technology and Performance

24/7 Programming

All models can be programmed to operate autonomously 24 hours a day, 7 days a week.

Fast and Efficient Recharging

Charges from 10 to 80% in 2 hours, minimising downtime

Automatic Recharging Station

Available as an option for complete autonomy, without human intervention

Ecological Maintenance

Quiet, emission-free, environmentally friendly and trouble-free for neighbours

100%
